Integrated Platform

Our platform enables care teams with tools to improve communication, education, safety, and clinical workflows - ultimately enhancing family experience and health outcomes.

NICU2Home

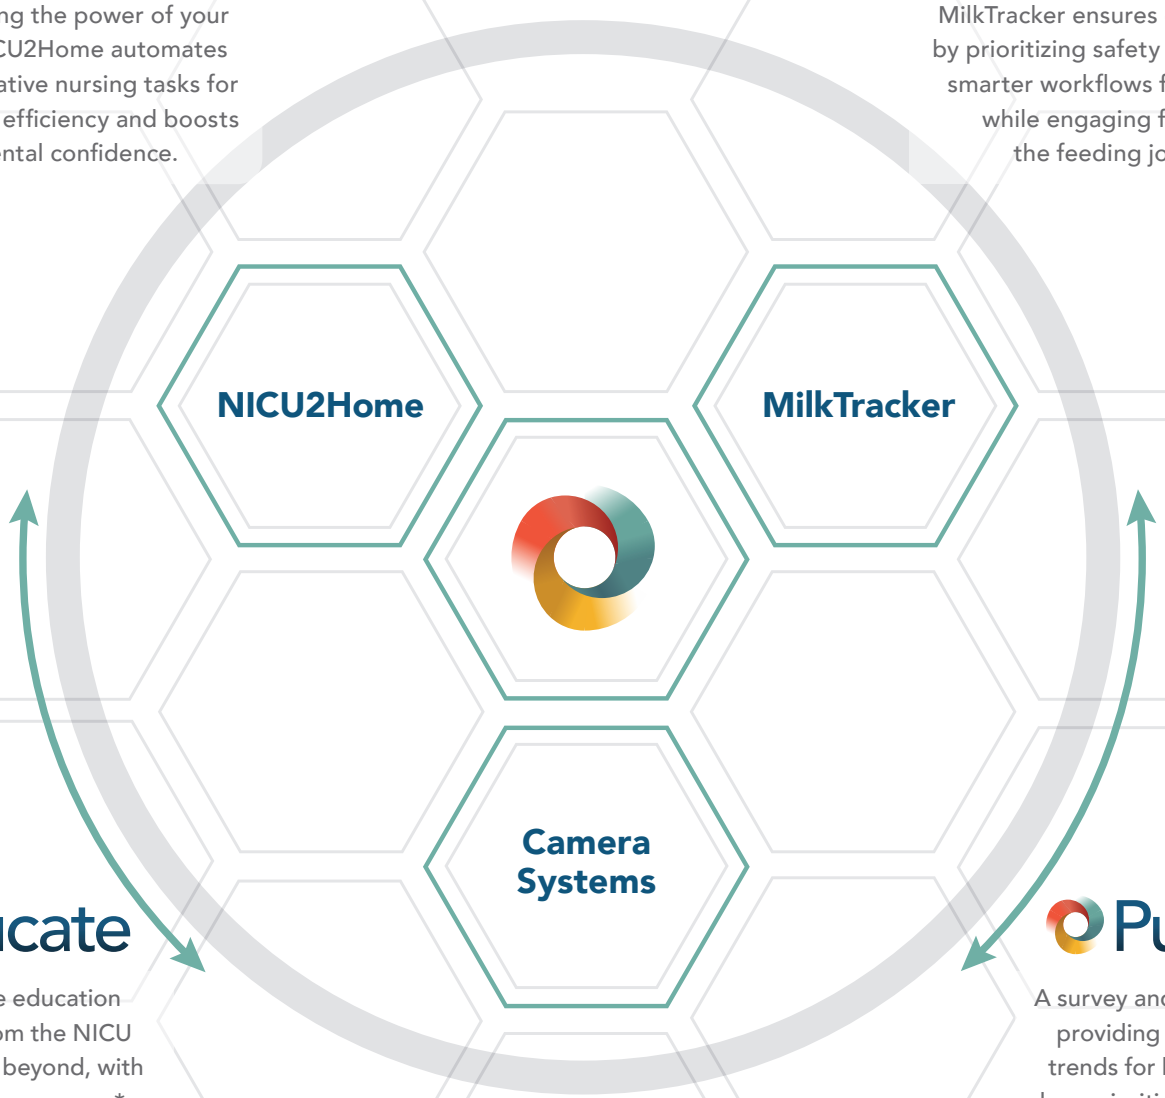

Navigation & Discharge Coordination

Leveraging the power of your EHR, NICU2Home automates administrative nursing tasks for improved efficiency and boosts parental confidence.

MilkTracker

Feeding Management

MilkTracker ensures correct feeds by prioritizing safety at every step, smarter workflows for clinicians, while engaging families in the feeding journey.

Educate

Streamline education delivery from the NICU journey and beyond, with minimal IT resources.*

Pulse

A survey and insight tool providing actionable trends for leaders and clear priorities for teams.*

CameraSystem

Live-Stream Video & Messaging

Bedside cameras provide secure live-stream video alongside care team messages, allowing families to feel connected anytime, anywhere, on any device.

**New offerings that seamlessly integrate with all AngelEye solutions*
