AEH Overview Video

Solution Summary

Platform Overview

AngelEye's integrated services connect caregivers and families with video data, clinical analysis, navigation and discharge management, and feeding documentation to ensure a smooth transition to health for pediatric patients. The software was designed with direct feedback from NICU care teams and parents to streamline workflows, enhance patient care, and ultimately improve outcomes for your most vulnerable patients.

For more information about AngelEye Health, please visit our website at angeleyehealth.com.

NICU2Home

Navigation & Discharge Coordination

NICU2Home is the first evidence-based NICU navigation & discharge coordination solution to support families and care teams.

NICU2Home redefines NICU navigation and discharge coordination, leveraging the power of your hospital's EHR and cultivating confident families. This solution provides seamless support for families and clinicians throughout the NICU stay, helping families safely transition from the NICU to home.

Benefits for Parents

- Improve health outcomes
- Enhance continuity in communication & care
- Improve engagement with the care team
- Increase parental confidence & competence
- Enhance understanding with multilingual support (70+ languages)

Solution Summary

MilkTracker
Feeding Management

MilkTracker is the safest, most comprehensive end-to-end Milk Scanning & Feeding Management Solution available. MilkTracker takes "feeding management" to a whole new level, surpassing the basic task of ensuring correct feeds for patients. MilkTracker engages families in the feeding process and supports their breastfeeding goals from a single, easy-to-use home screen.

MilkTracker's parent app provides mothers with the tools they need to have informed ownership of their milk management, creating a truly closed-loop system.

Benefits for Parents

- Log and track pumping sessions with real-time review of EBM inventory at home vs. at the hospital.
- Connect with in-hospital lactation support through 2-way messaging to assist parents in achieving breastfeeding goals.
- Free app with translations into 70+ languages.

By reducing errors and optimizing resources, MilkTracker improves patient safety, boosts staff efficiency, and creates a more engaging experience for families. **With MilkTracker, feeding becomes a safer, more efficient, and inclusive experience for all.**

Solution Summary

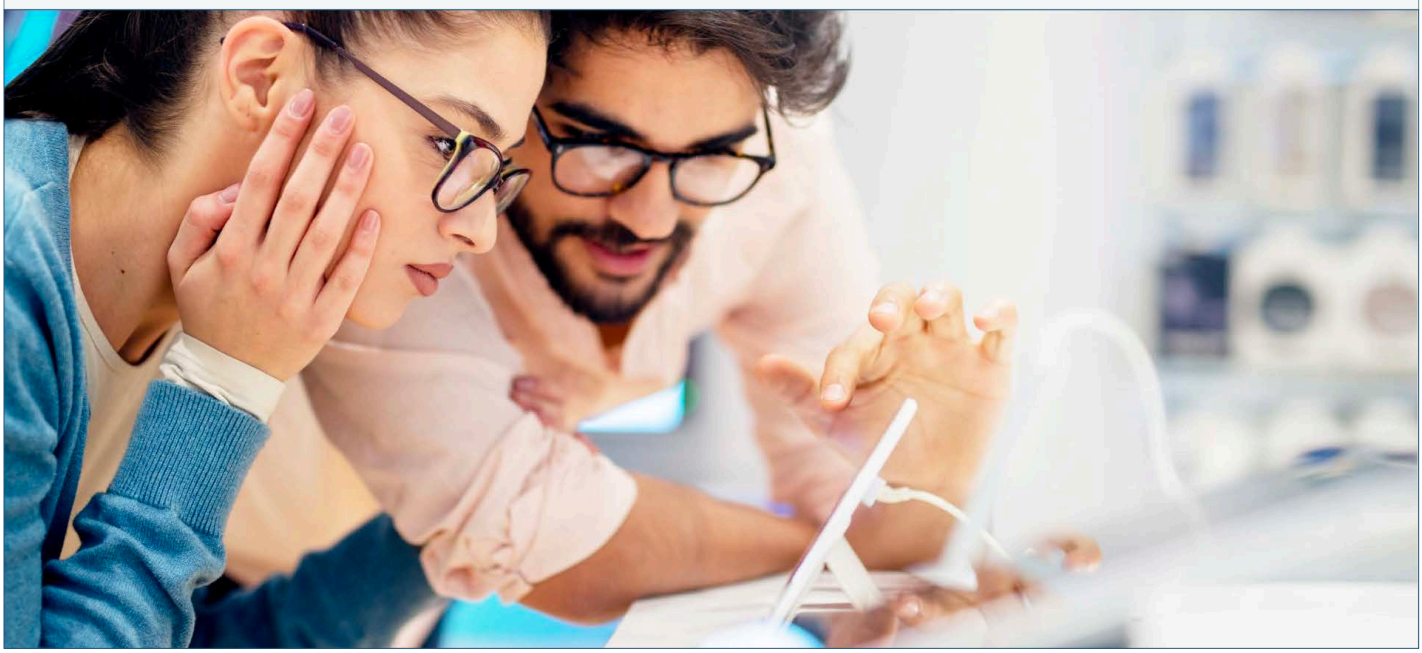

CameraSystem

Live-Stream Video & Messaging

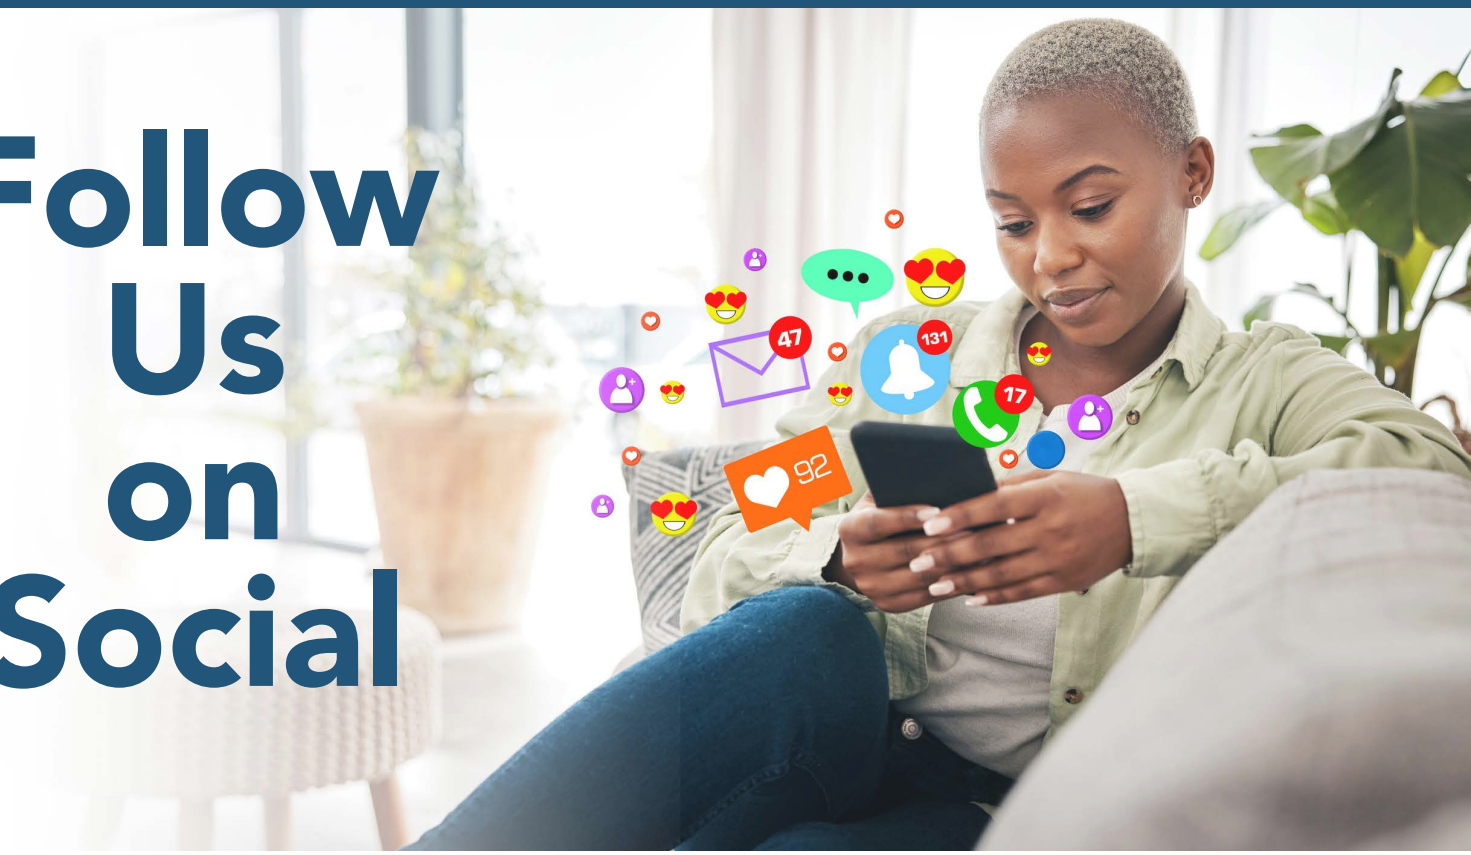

Our bedside cameras connect parents & families with their hospitalized child engaging parents as essential members of the care team. The CameraSystem offers live-streaming video access to your child's progress, no matter where you are or what device you're using. This innovative solution also enables care teams to share important updates and heartwarming moments in real-time through text, photos, and videos. This combined approach can help ease the stress and anxiety of parents with children in the NICU or pediatric unit, foster stronger connections when you can't be at the hospital, and enhance the efficiency of your hardworking care team.

Benefits for Parents

- Offers flexible viewing options anywhere, anytime.
- Includes video message replay options.
- Alerts parents when new messages are delivered.
- Supports parents' role as integral members of the care team.
- Ensures parents don't miss memorable moments or essential care updates.

About AngelEye Health

Over 300 hospitals chose AngelEye Health to help care teams build an AI-driven path to better clinical and operational outcomes for their neonatal and pediatric patients. AngelEye Health, the leading technology provider, understands the obstacles families and care teams in acute pediatric units face. Our comprehensive suite includes a reliable CameraSystem, MilkTracker for feeding management, NICU2Home for discharge management, and EDNA for risk identification —all designed to measurably reduce length of stay, minimize errors, and optimize resource allocation. We conitnually enhance our solutions with new innovative features that will shape the NICU of the future, where technology empowers families, supports care teams, and leads to the best possible outcomes.
