

NICU2Home

Navigation & Discharge Coordination

Impact Outcomes with the first, evidence-based NICU navigation and discharge coordination solution.

AngelEye Health's NICU2Home Solution redefines NICU navigation, leveraging the power of your EHR and cultivating confident families. Experience a new era of seamless support for families and clinicians throughout the NICU stay and help them safely transition from the NICU to home.

The Power to Empower

Impact Care Teams

- Improve efficiency and workflow
- Proactively identify and support at-risk families
- Reduce readmission rates
- Lower costs by reducing length of stay
- Improve morale

Impact Families

- Improve health outcomes
- Enhance continuity in communication and collaboration
- Boost parental competence and confidence
- Improve engagement
- Greater understanding with automated translations in 70+ languages

Watch a quick video

Automates administrative nursing tasks, **reducing** routine parental update **calls** by about **50%**.

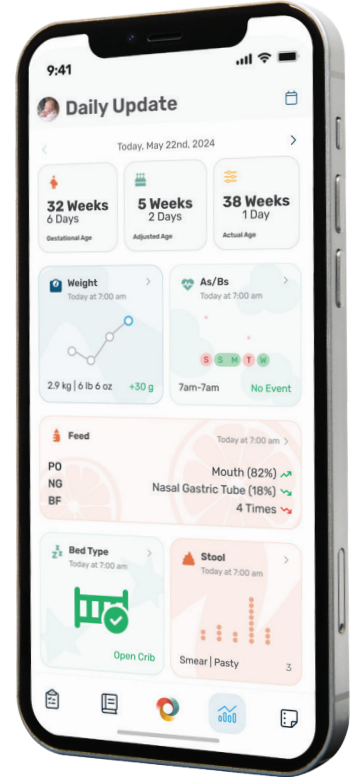

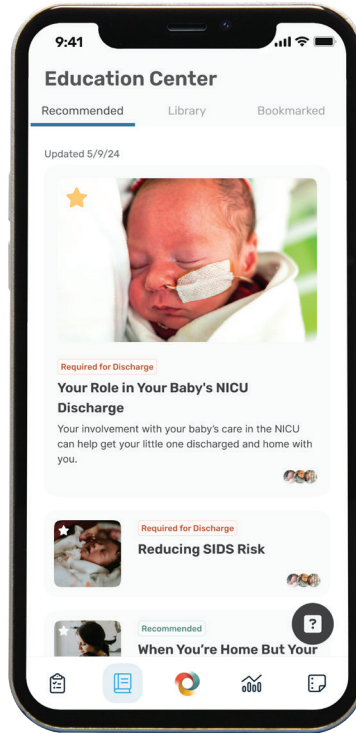

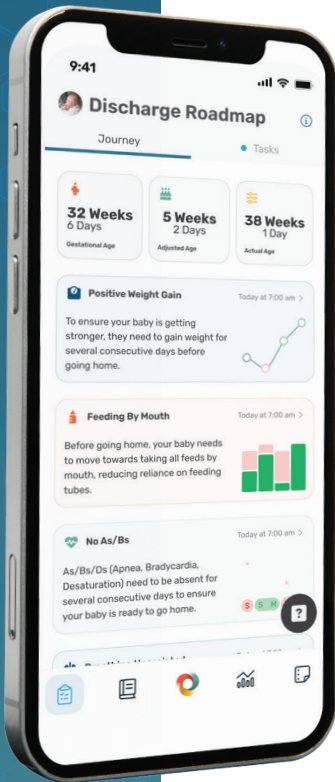

NICU2Home Key Features for Seamless Support

Dynamic Roadmap – A clear, visual guide that integrates physiologic milestones and family tasks throughout the NICU journey.

Education Resource Delivery – Delivers automated, patient-specific educational content (available in 70+ languages) to improve staff efficiency while empowering families.

Daily Updates – Daily EHR updates for families presented in clear, easily accessible graphs with straightforward definitions to enhance family engagement and streamline staff workflow.

And Secure Messaging

Enhance NICU communication with secure messaging for seamless connection with families, saving clinicians' time.

Family Experiences: Data from 169 Families in 3 NICUs

90%	of families understood their baby's progress	77%	were more confident in caring for their baby
70%	made fewer calls to the NICU	79%	were less anxious day-to-day
