

Impact

OUTCOMES

with evidence-based NICU navigation and discharge coordination software

AngelEye Health's NICU2Home Solution redefines NICU navigation, leveraging the power of your EHR and cultivating confident families. Experience a new era of seamless support for families and clinicians throughout the NICU stay and help them safely transition from the NICU to home.

The Power to Empower

IMPACT STAFF

- Improve staff efficiency & save staff time
- Proactively identify and support at-risk families
- Reduce readmission rates
- Decrease cost by reducing length of stay

IMPACT FAMILIES

- Improve health outcomes
- Enhance continuity in communication and care
- Increase parental confidence & competence
- Improve Engagement

Effectively Reaching Families: (data from three NICUs)

2,000+

FAMILIES

8.3+

NET PROMOTER SCORE

25+

DAILY USAGE (TAPS/DAY)

Current Challenge:

- Parents forget or misremember **80%** of care instructions¹
- **15%-37%** of NICU infants require readmission within one year²
- Parental education is concentrated in the **48-72 hours** prior to discharge³

Learn More

By the Numbers:

Data from 169 families in 3 NICUs confirmed that:

- 90% Understood their baby's progress
- 70% Made fewer calls to the NICU
- 77% Were more confident caring for their baby
- 79% Were less anxious day-to-day
- 76% Spent less time seeking information on the internet

Testimonials

"We have to embrace that parents will go to their phones first to look up information and the NICU2Home app is a way to steer parents toward the most accurate information/content as it relates to their infant." – **Neonatologist**

"The daily update (especially weight, milestones) were highlights we anticipated every morning. It helped me gauge progress without feeling like I was bugging the nurses." – **Mother, 33 weeks**

Dynamic Roadmap: Guiding the NICU Journey

A visual guide that integrates physiologic milestones and family tasks empowering parents with a clear understanding of the NICU journey.

Surveys: Tailoring Care Through Feedback

Automated, adaptable assessments inform real-time, personalized care adjustments and clinical feedback to enhance outcomes and satisfaction.

Education and Resource Delivery: Streamlining Family Readiness

Automated education delivery synchronized with the baby's health journey, improving staff efficiency while empowering families.

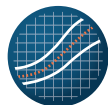

Align Schedules: Optimizing Clinical Care and Staff Efficiency

Enhances team collaboration and boosts clinical productivity, enabling efficient planning of visits and care activities.

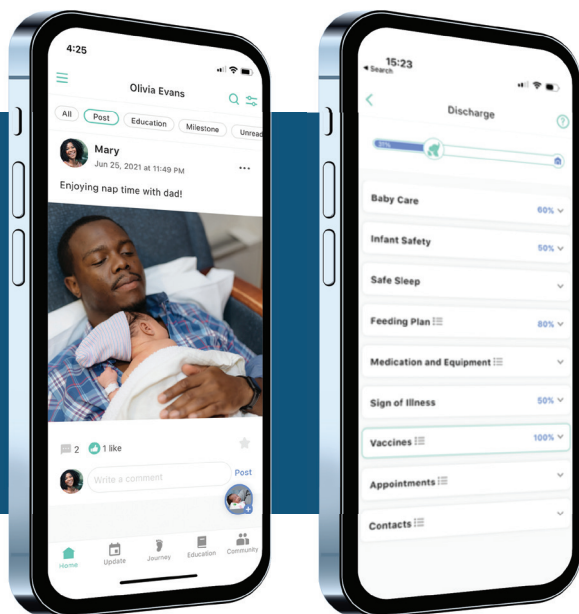

Secure Messaging: Enhancing NICU Communication

Real-time updates and diverse communication options in the family's preferred language and modality foster informed, engaged families, ultimately saving the clinicians' time.

Data Visualization: Delivering Insights

Displays select EHR data as clear, accessible graphs with straightforward definitions, enabling parents to grasp their child's status and progress easily.
