

Meaningful Connections

ENGAGE. EDUCATE. EMPOWER.

AngelEye Health's solutions connect parents, their infant, and the care team with around the clock live-streaming video, education, and communication.

AngelEye's HIPAA-compliant platform includes three independent solutions.

Family Engagement:

Visual access anytime, anywhere encourages family bonding and decreases anxiety.

- 24/7, live streaming video
- In-app translator
- Real-time family chat

Parent Education:

On-demand resources empower parents with information to ensure a successful transition home.

- Customizable
- Free app and online
- Available post discharge

Clinical Communication:

Integrate parents as integral members of the care team with real-time and recorded updates.

- Share vital information and memorable moments
- One-way video, picture, and text

70+ Hospitals

Average parent logs in 5+ times per day

Parents average 3.5 minutes per visit

The Value of AngelEye Solutions

Quality:

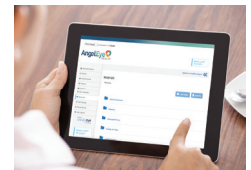

- Decreases readmissions by providing tailored education
- Supports neurodevelopment through one-way audio feature
- Improves bonding and attachment through a visual connection
- Fosters engagement with easier access to the care team
- Increases breastmilk production with continual viewing

Satisfaction:

- Builds trust between parents and the care team
- Empowers parents and families to feel valued as integral members of the care team
- Increases family engagement
- Improves staff and family satisfaction by reducing workflow interruptions
- Minimizes stress-related tasks with the messaging feature

Efficiency:

- Provides parents visual reminders to complete tasks required for discharge
- Reduces staff time educating families
- Decreases time spent rounding with a real-time survey feature

|  Care Team Messages One-way text message updates from care team to primary parent account | | ✓ | ✓ (Prescribed only) |
|  Parent Communication Store and forward patient update videos, education videos, and photos to primary parent | | ✓ | |

Testimonials

FROM ONE OF OUR FAMILIES:

"It gives us confidence. Instead of calling every few hours to check in, we only call once a day. When we log in and see she's smiling, it makes our day and relieves some of our anxiety."

– DJ Manevski, Parent
Children's Hospital of Philadelphia

FROM ONE OF OUR CLIENTS:

"Many of our families are transported to UNC from all over the state and are not able to visit on a daily basis, so this allows them an opportunity to see their baby every day, multiple times a day. Our parents rave about this offering and it has actually drawn some families to this unit specifically because we offer this technology."

– Jennifer Flippin
RN, BSN, RNC-NIC, Nurse Manager, UNC Hospital
