

# Improve

## OUTCOMES

By encouraging and supporting parent and family bonding with their infant

As we continue to innovate and add new capabilities, the bedside camera can be automatically updated with additional functionality without having to replace the camera.

You benefit from our commitment to listening and continually improving our technology without the hassle and expense of downtime associated with swapping hardware.

**5-inch LCD Touch Screen** to assist with camera positioning and on/off capability

**Upgrade-ready** for remote software updates

**Infrared Capabilities** for a clear visual, even in the darkest environments

**Wired or WIFI Networking Capability** to meet your facility preferences

**Flexible mounting** options for any unit configuration

**USB Ports** to enable future functionality
