

Position: AngelEye Technical Support Analyst

Position Overview:

The Technical Support Analyst provides technical assistance and support to end-users (hospital employees and patient families) for hardware, software, and network-related issues. This role is critical for maintaining the smooth operation of technology systems and ensuring timely resolution of technical problems. The ideal candidate has strong problem-solving skills, excellent communication abilities, and a customer-focused approach. This position is ideal for individuals passionate about technology and customer support, eager to grow their skills in a dynamic and collaborative environment.

Reports To:

This position reports to the VP of Customer Experience.

Location and Hours:

- This is a full-time position (40 hours/week) located in Little Rock, AR.
- This position requires being a part of the 24/7, 365-day, after-hours coverage rotation with other members of the IT support team. Currently rotation is 1 week at a time, frequency of rotation dependent on Company needs.

Key Responsibilities:

- Respond to technical support requests via phone, email, and ticketing system in a timely manner which is dictated by internal metrics.
- Diagnose and troubleshoot hardware, software, and network issues across various platforms.
- Install, configure, and update computer systems, applications, and peripherals.
- Provide training and guidance to end-users on software applications and best practices.
- Escalate complex technical issues to higher-level support teams as necessary.
- Document and track support requests, resolutions, and procedures in the ticketing system.
- Collaborate with the IT team to improve system performance and reliability.
- Assist in maintaining camera hardware inventory, ensuring all assets are properly repaired, tracked and updated.
- Stay updated on emerging technologies and industry trends to provide effective solutions.
- Contribute to knowledge base articles and self-help documentation for end-users.

Qualifications:

- Education: Associate or bachelor's degree in information technology, computer science, or a related field preferred (or equivalent experience)
- Experience: 1-3 years of technical and/or customer support or IT help desk experience preferred.
- Technical Skills: Proficiency in troubleshooting operating systems (Windows, macOS), Microsoft Office Suite, remote desktop tools, and networking concepts (TCP/IP, DNS, VPN). Proficiency in ticketing systems and remote support tools. Experience with Salesforce is also preferred.
- Certifications: CompTIA A+, ITIL Foundation, or similar certifications are a plus.
- Soft Skills: Excellent communication, problem-solving, and customer service skills.

- Other Requirements: Ability to prioritize tasks, work independently, and handle multiple issues simultaneously.
