

# Improve

## OUTCOMES

by providing essential education

AngelEye Health's flexible OnlineEducation Solution empowers parents by offering a portal where hospitals can provide customizable education and monitor parents' progress on the patient's path to discharge.

**The Solution supports original or licensed photos, videos, PDFs, and presentations organized in a flexible folder structure customized to meet the needs of your families.**

In addition to the hospital's proprietary information, the Solution offers 27 optional pre-loaded videos available in English and Spanish. Parents have access to the full set of resources during their child's stay and post-discharge.

- Easy-to-use interface makes managing education content straightforward and effortless.
- Content is available on our free App or online.
- Content can be marked as "core," ensuring all families receive information automatically on admission.
- Content can be assigned to meet the specific needs of each family.
- The App now includes an embedded "acknowledgment" feature that notifies staff when required education is complete.
- The Discharge Checklist isolates required education for an at-a-glance view of the parents' progress toward a timely discharge.
