

Position: Technical Implementation Specialist

Position Overview:

As the Technical Implementation Specialist for MilkTracker Projects at AngelEye Health, you will play a pivotal role in ensuring the successful deployment of complex technical solutions to our clients. You will work with a team of project managers, clinicians, and engineers, oversee project timelines, and collaborate with cross-functional teams to deliver high-quality deployment projects on time.

Reports To:

The role will report directly to the Vice President of Technology and works out of the Little Rock, AR office.

Expertise Required:

Experience in networking and software troubleshooting.

Docker Deployments, Docker Networking, and Linux Server Administration.

Working well with large and small teams.

Communicating a plan to team members and customers to achieve effective, timely deployments.

Knowledge of LDAP, SSL generation, and mobile deployment is a plus.

AngelEye Health, Inc. offers you:

- A growth-oriented team environment where your strengths are highly valued
- Opportunities to expand your technical skills and knowledge with on-the-job learning/training opportunities
- Fully paid employee health insurance premium

Company Mission Statement:

Equipping care teams and empowering families of neonatal and pediatric patients to improve outcomes.

Values and Core Beliefs:

- Mission: Equipping care teams to empower families of neonatal and pediatric patients to improve outcomes.
- Patients and their families first; Hospital Partners a close second; Our Team and their families make it all happen.
- Curiously innovate; Failure isn't fatal, and success isn't final.
- Execute the basics at a PhD level.
- Create and Maintain a Sense of Urgency!
- Effective communication is key!
- Transparency and Honesty in everything we do.
